GENERAL INDEX

Classified entries will be found under Contributors and Reviews. New names and names of new genera and species are printed in **bold-face** type; synonyms in *italics*.

A

Acid injury of cotton roots 430, 436
Address list of botanists, international 224
Albrecht, W. A. 263
Alpine plants in gardens 335
Analysis, handbook of plant 332
Anatomy, of normal and acid-injured cotton roots 436; of transition region of Pisum 367; of primary axis of Solanum 407
Andersen, Emma N. 66
Ashby, E., translation of "Environment and plant development" 334
Atkinson, G. F. 225

B

Bacterial plant pathogens 336
Bananas, ripening effect of ethylene on 337
Bella Coola region, ecological survey of 141
Berkley, E. E. 85
Bidens, new species of 450; **oligocarpa** 206; **personans** 205; **phelloptera** 204; **praecox** 450
Biochemistry, principles of plant 331
Bonazzi, A. 442
Boron for health in citrus 94
Borthwick, H. A. 23
Bryophyllum, factors affecting growth from foliar meristems of 113
Buchholz, J. T. 243
Burge, W. E. 321

C

Calcium in relation of "damping off" of soy bean seedlings 263
Ceratopteris, morphology of 326
Chicago textbook, revised edition of Vol. III 452
Chromosomes of Gasteria 45
Cicatrization of foliage leaves 279
Citrus, boron for health in 94; relative abundance of stomata in 296
Communities, plant 453
Compositae, new or otherwise noteworthy 202

C. 321; Williams, E. 321; Wolfe, H. S. 337; Wylie, R. B. 279
Cotton roots, acid injury of 430, 436
Cross, G. L. 210

D

"Damping off" of soy bean seedlings 263
Daucus carota, gametophyte and embryo of 23

E

Eaton, S. V. 111, 330, 454
Ecological survey of Bella Coola region 141

Ecology, plant 112
Elliott, Charlotte, "Manual of bacterial plant pathogens" 336
Embryo, of Daucus carota 23; of Osmunda 210
Environment and plant development 334
Equisetum, gametophytes of 1
Ericentrodea **decomposita** 207
Ethylene, ripening effect on bananas 337
Explorations, botanical 336
Ezekiel, W. N. 430

F

Fertilizer science, handbook of 110
Fertilizers and sugar utilization in Spirogyra 321
Fruit culture 333
Fuller, G. D. 334, 335, 336, 454

G

Gametophyte, of Daucus carota 23; of Equisetum 1
Gases, sugar cane 442
Gasteria, chromosomes of 45
Gildehaus, E. J. 384
Glucosides 454
Gore, U. R. 436
Gourley, J. H. 367
Growth as influenced by illumination 311

Mottier, D. M. 218
Mycorhiza, tree 454

N

Needle structure as an aid in distinguishing spruce species 446
Nichols, G. E. 452, 453

Nitrogen/potassium ratio and nutrition of fruit trees 384
Nutrition of fruit trees 384

O

Onslow, Muriel W., "Principles of plant biochemistry" 331
Osmunda, embryology of 210

P

Palmer, H., "Edward W. D. Holway: pioneer of the Canadian Alps" 336
Penetration of seed coats by ultraviolet radiation 420
Physiology, plant 330
Pisum, anatomy of transition region of 367
Potassium/nitrogen ratio and nutrition of fruit trees 384
Potato, regenerative capacities of 192
Prairie, tall-grass 109
Prothallia, sex organs of fern 218

Q

Quercus, marcescent leaves of 85

R

Radiation, ultraviolet, penetration of seed coats by 420
Ramaley, F. 311
Regenerative capacities, of Bryophyllum 113; of tomato and potato 192

Riella americana, spore germination in 172
Ripening of bananas by ethylene 337
Rose, M., "La question des tropismes" 452
Rübel, E., "Pflanzengesellschaften der Erde" 453

S

Sciadopitys, suspensor of 243
Sex organs of fern prothallia 218
Sherff, E. E. 108, 202, 450
Shull, C. A. 110, 331, 332, 333, 420, 452
Solanum, anatomy of primary axis of 407
Soy bean seedlings, "damping off" of 263
Sperm discharge in Marchantia 66
Spirogyra, sugar utilization in, by means of fertilizers 321
Spores of Riella americana, germination of 172
Spruce species, distinguished with aid of needle structure 446
Stamm, A. J. 101
Stomata, relative abundance in citrus 296
Strausbaugh, P. D. 112
Studhalter, R. A. 172
Sugar cane gases 442
Sugar utilization in Spirogyra by means of fertilizers 321
Suspensor of Sciadopitys 243
Sylloge Fungorum 336

T

Taubenhaus, J. J. 430, 436
Taxonomy of flowering plants 108
Thiel, A. F. 407
Tomato, regenerative capacities of 192
Tracheid, method for measuring proportionate length of 101

Tropisms, the question of 452
